ACC deaminase gene (acdS), of *E. cloacae* UW4, role in root elongation, 101
Agglutinins, from *Rhizobium leguminosarum* effect activity of hydrolytic enzymes, 73
Alanine racemases, from *Pseudomonas aeruginosa*, characterization of, 290
α-galactosidase, from *Zygosaccharomyces mrakii*, nucleotide sequence of *MEL* gene encoding, 220
alr$_{PA}$ gene, of *P. aeruginosa* PAO1, cloning, sequencing, overexpression, and activity of, 290
Alteromonas-like proteobacteria, phospholipid and fatty acid compositions as chemotaxonomic markers of, 341
Aluminum, effect on siderophore production by *Rhizobium* sp. strain BICC 651, 5
Amphibacillus xylanus, 20-kDa component of *Bacillus* YN-1 similar to AhpC of, 388
Anabaena, expression of *Bacillus sphaericus*, binary toxin genes in, 352
Anabaena genera, phylogenetic and taxonomic values of *nifH* sequences of, 197
Anabaena variabilis, isolation and characterization of thylakoid membranes from NaCl^r mutant strain of, 321
Antibacterial activity, of synthesized carbohydrate monoesters against *S. mutans*, 210
Antibiotics, waste water bacterial isolates resistant to, 151
Aphanothece halophytica, degradation of glycinebetaine by betaine-homocysteine methyltransferase in, 227
API 50 CH fermentation profiles, of *Lactobacillus* sp., temperature-dependent variation in, 21
Apis mellifera propolis, effect on growth, cell adherence, and WIG synthesis of mutans streptococci, 192
Aromatic hydrocarbons, waste water bacterial isolates resistant to, 151
Aspergillus niger, protein disulfide isomerase secreted in, 295
Astragalus cicer microsymbionts, numerical analysis of phenotypic characteristics of and relationship to *Mesorhizobium* species, 142
Autochthonous microbiota, from granitic aquifer, variation after bottling, 379
Automobile air conditioning systems, volatile organic compounds from microbes in, 206

Bacillus isolates, from Gulf of Mexico, phylogenetic relationship of pigmented forms of, 84
Bacillus polymyxa, enzyme activity of lectins from, 246
Bacillus sp., biodegradation of phenanthrene by, 11
Bacillus sphaericus, expression in *Anabaena* of binary toxin genes from, 352
Bacillus subtilis, *glnR* from *S. aureus* regulates glutamine synthetase expression in, 425
Bacillus subtilis purine repressor (PurR), PRPP effector function affected by mutation of, 56
Bacillus thuringiensis characterization of INTA 51-3 strain of, 396
cry1I-type crystal protein gene cloned from, 65
from three environments, comparison of frequency, flagellar serotype, crystal shape, toxicity, and *cry* gene contents of, 250
pesticidal and receptor binding properties to cotton pests of Cry1Ab and Cry1Ac mutants of, 430
toxicity and receptor binding properties of δ-endotoxins of, 276
toxicity and short circuit current inhibition against *H. zea* of δ-endotoxins of, 214
Bacillus thuringiensis A4 strain, insecticidal activity against *Bactrocera oleae* correlates with 140-kDa crystal polypeptide of, 262
Bacillus thuringiensis var. israelensis, hyperproduction of δ-endotoxins not related to sporulation-specific biochemical function of, 187
Bacillus YN-1, peroxide reductase activity of NADH dehydrogenase of, 388
Bacteriocins class IIa, natural variation in susceptibility in *Listeria* strains to, 1
effect on survival of *Listeria* species in broth and meat system of combination of, 410
subclass IIa, *rpoN* gene of *E. faecalis* directs sensitivity to, 441
Bacteriophage λ replication complex, in UV-irradiated *E. coli*, formation and stability of, 157
Bacteroides ovatus, deoxyribonuclease activity in, 182
Betaine-homocysteine methyltransferase, degradation of glycinebetaine in *Aphanothece halophytica* by, 227
Binary toxin genes, from *Bacillus sphaericus* expressed in *Anabaena*, 352
Biosorbent material, of marine algae for Pb^{2+} removal, 239
Brevibacterium linens strains, pulsed-field gel electrophoresis and ribotyping for genetic fingerprinting of, 50
Brugia malayi, *wsp* gene sequences from *Wolbachia* of, 96
Burkholderia sp. YK-2, induction of stress shock proteins DnaK and GroEL by phenoxyherbicide 2,4-D in, 33

C19 cyclopropane fatty acid, in lipid fraction of *Zymomonas mobilis*, 305
Cadmium, resistance of aerobic and anaerobic thermophilic microorganisms to, 201
Calcium ions, nitrogen assimilatory enzymes in *Spirulina platensis* modulated by, 368
Candida albicans, cloning and characterization of gene homologous to *FBP1* gene, 384
Carbohydrate monoesters, cell growth of *S. mutans* in presence of sucrose suppressed by, 210
Carboxymethylcellulase activity, of *Prevotella* type strains on different growth substrates, 45
Catheters, effect of hydrogen/silver coatings on bacterial adhesions associated with urinary tract infections, 120
Cell adherence, of mutans streptococci, inhibition by propolis, 192
Chemotaxonomic markers, of *Alteromonas*-like proteobacteria phospholipid and fatty acid compositions as, 341
Cicer arietinum, effect of aluminum on production of siderophore by, 5
Cnaphalocrocis medinalis, toxicity and receptor binding properties of *B. thuringiensis* δ-endotoxins to midgut brush border membrane vesicles of, 276
Cobalt, resistance of aerobic and anaerobic thermophilic microorganisms to, 201
Cooling tower water systems, routine sampling and control of *Legionella* spp. in, 271
Cry gene contents, of *B. thuringiensis* isolates, PCR analysis of, 250
Cry1 genes, present in *B. thuringiensis* INTA 51-3 strain, 396
Cry1Ab and Cry1Ac mutants, of *B. thuringiensis*, pesticidal and receptor binding properties of to bollworms, 430
Cry1I-type gene (cry1Id1), cloned from *Bacillus thuringiensis, 65*
Cryptic plasmid pSBO2, isolated from *Streptococcus bovis* JB1, 27
Crystal polypeptide, correlates with insecticidal activity of *B. thuringiensis*, 262
Crystal protein hyperproduction, of hypertoxic mutant strains not related to sporulation-specific biochemical functions, 187
Cumene hydroperoxide, NADH dehydrogenase of *Bacillus* YN-1 exhibited peroxide reductase activity for, 388

Cyclopropane fatty acids, produced by *P. jessenii*, low-substrate regulated microaerophilic behavior shown by, 79
Cystoseira trinode, biosorption of heavy metals by, 232

dadX$_{PA}$ gene, of *P. aeruginosa* PAO1, cloning, sequencing, overexpression, and activity of, 290
Deoxyribonuclease activity, in *Selenomonas ruminantium* and *Bacteroides ovatus*, 182
Deoxyribonucleosides, utilization by *S. ruminantium, S. bovis*, and *B. ovatus*, 182
2-Deoxyribose, utilization by *S. ruminantium, S. bovis*, and *B. ovatus*, 182
2,4-Dichlorophenoxyacetic acid (2,4-D), stress shock proteins induced in *Burkholderia* sp. YK-2 by, 33
Dirofilaria immitis, *wsp* gene sequences from *Wolbachia* of, 96
Disulfide isomerase protein, secretion in *Aspergillus niger* for purification of, 295
Divercin V41, natural variation in susceptibility in *Listeria* strains to, 1

Electrocuting insect traps, release of bacteria and viruses from flies killed by, 267
Enterobacter cloacae UW4, ACC deaminase minus mutant of, 101
Enterobacter cowanii sp. nov., new species of family *Enterobacteriaceae*, phenotypic and genotypic characteristics of, 417
Enterobacteriaceae, characteristics of *Enterobacter cowanii* new species of, 417
Enterocin A, natural variation in susceptibility in *Listeria* strains to, 1
Enterocin CRL35, combined with other bacteriocins, effect on *Listeria* species survival, 410
Enterococcus faecalis effect of insulin on growth kinetics of, 60
nucleotide sequence of plasmid pS86 from, 257
sensitivity to subclass IIa bacteriocins directed by *rpoN* gene of, 441
Epithelial cells, *rfa* expression in *Salmonella typhimurium* during invasion of, 172
Escherichia coli effect of insulin on growth kinetics of, 60
formation and stability of λ replication complex after UV irradiation of, 157

Fatty acid composition, as chemotaxonomic marker of *Altermonas*-like proteobacteria, 341
Fibronectin binding, adherence of *Lactobacillus* to intestinal 407 cells in culture correlates with, 136
50S ribosomal subunit formation, inhibited by 16-membered macrolide, lincosamide, and streptogramin B antibiotics, 126
Filarial nematodes, *wsp* gene sequences from *Wolbachia* of, 96
Formate dehydrogenase H (fdhF), mutations of *selD* mutant of *S. typhimurium* permitting expression of, 39
Fructose-1,6-bisphosphatase gene (FBP1), cloning and characterization of *Candida albicans* gene homologous to, 384
Fructose laurates, cell growth of *S. mutans* inhibited by, 210
Fusarium oxysporum, effect of disruption of stress responsive gene (*sti35*) on growth and development of, 284
Fusarium oxysporum 11dn1, nitrate reductase activity in and nitrous oxide production by, 114
Fusarium oxysporum var. lini, potassium and sodium fluxes in, 363

Galactose, cell growth of *S. mutans* inhibited by, 210

γ-proteobacteria species, occurrence of multiple ribonucleotide reductase classes in, 346
Gas vacuoles, in halotolerant methanogen *Methanosarcina mazei* strain O1M9704, 15
Genetic fingerprinting, of *B. linens* strains by PFGE and ribotyping, 50
Glaciecola, phospholipid and fatty acid composition of, 341
GlnR, from *S. aureus, Bacillus subtilis* glutamine synthetase expression controlled by, 425
Glutamate, in *K. pneumoniae* grown under different nitrogen availability, internal pool of, 357
Glutamine, in *K. pneumoniae* grown under different nitrogen availability, internal pool of, 357
Glutamine synthase activity, in *Spirulina platensis* under Ca^{2+}- and Pi-starved conditions, 368
Glutamine synthetase expression, in *Bacillus subtilis*, effect of *S. aureus glnR* on, 425
Glycinebetaine, degraded by betaine-homocysteine methyltransferase in *Aphanothece halophytica*, 227
Granitic aquifer, isolation and characterization of autochthonous microbiota from, 379
Gulf of Mexico, phylogeny of marine *Bacillus* isolates from, 84

Heat shock gene (sti35), of *Fusarium oxysporum*, targeted disruption of, 284
Heat stress proteins, low-molecular-weight, on plasmids of *S. thermophilus*, 177
Heavy metals biosorption by marine algae of, 232
resistance of aerobic and anaerobic thermophilic microorganisms to, 201
waste water bacterial isolates resistant to, 151
Helicobacter sp., status of contamination of laboratory animals by, 161
Helicoverpa zea, pesticidal and receptor binding properties of *B. thuringiensis* Cry1Ab and Cry1Ac mutants against, 430
Hemagglutinating activity by *Porphyromonas gingivalis*, effect of increased temperature on, 328
of *Bacillus polymyxa* lectins, relationship with proteolytic activity, 246
Hemoglobin binding, by *Porphyromonas gingivalis*, effect of increased temperature on, 328
Heptadecanoic acid, in lipid fraction of *Zymomonas mobilis*, 305
Hexachlorocyclohexane isomers, enhanced degradation by *Sphingomonas paucimobilis*, 309
Hot water devices, *Legionella pneumophila* occurrence in, 374
Hydrochloric acid pretreatment, effect on biosorption capacity of heavy metals by marine algae, 232
Hydrogen peroxide, NADH dehydrogenase of *Bacillus* YN-1 exhibited peroxide reductase activity for, 388
Hydrolytic enzyme activity, of *R. leguminosarum*, effect of agglutinins on, 73
Hypertoxic mutant strain, sporulation-specific biochemical functions not related to crystal protein production by, 187

Idiomarina, phospholipid and fatty acid composition of, 341
Incubation temperature, variation in API 50 CH fermentation profiles of *Lactobacillus* strains dependent on, 21
Insecticidal activity, of *B. thuringiensis* correlates with 140-kDa crystal polypeptide, 262
Insulin, effect on growth kinetics of Gram-negative and Gram-positive bacteria, 60
Insulin hydrolysis, of flocculating yeast strain, effect on Jerusalem artichoke extract fermentation yield, 89
Intestinal lesions, in laboratory animals, *Helicobacter* contamination with, 161
Invertase production, by *Lactobacillus amylovorus* JCM 1126 mutant strain, 392
Iron protoporphyrin IX production, by *Porphyromonas gingivalis*, effect of increased temperature on, 328

Jania rubens, role in biosorbent mass for recovery of, 239
Jerasalem artichoke extract fermentation, influence of yeast flocculation on rate of, 89

Klebsiella pneumoniae, resistant to heavy metals and antibiotics in waste water, 151

Laccase substrate, sporulation of *Pleurotus florida* and, 167

Lactobacillus acidophilus, adherence to intestinal, 407
epithelial cells correlates with fibronectin binding, 136
Lactobacillus agilis, adherence to intestinal 407 epithelial cells correlates with fibronectin binding, 136
Lactobacillus amylovorus JCM 1126, characterization of mutant strain YF43 of, 392
Lactobacillus sp., temperature-dependent variation in API CH fermentation profiles of, 21
Lactocin 705, combined with other bacteriocins, effect on *Listeria* species survival, 410
Laurencia obtusa, biosorption of heavy metals by, 232
Lead ions, removal by biomass of marine algae, 239
Lectins, on surface of *Bacillus polymyxa*, proteolytic activity of, 246
Legionella pneumophila, occurrence in hot water tanks and instantaneous devices, 374
Legionella spp., in cooling tower water systems, routine sampling for, 271
Lincosamides, inhibition of 50S ribosomal subunit formation by, 126
Lipopolysaccharide (LPS) synthesis, in *Salmonella typhimurium* during invasion of intestinal epithelial cells, 172
Listeria innocua, effect of combination of bacteriocins on survival of, 410
Listeria monocytogenes, effect of combination of bacteriocins on survival of, 410
Listeria strains, natural variation in susceptibility to class IIa bacteriocins, 1
Lithium uptake, in *Fusarium oxysporum*, effect of K^+ status on kinetics of, 363
Liver lesions, in laboratory animals, *Helicobacter* contamination with, 161
Low substrate regulated microaerophilic behavior, as stress response of aquatic and soil bacteria, 79
Luciferase, *Salmonella typhimurium* in intestinal epithelial cells reported by, 172

Macrolides, inhibition of 50S ribosomal subunit formation by, 126
Marasmia patnalis, toxicity and receptor binding properties of *B. thuringiensis* δ-endotoxins to midgut brush border membrane vesicles of, 276
Marine algae biosorption of heavy metals by, 232 removal of Pb^{2+} by biomass of, 239
Marinomonas strains, phospholipid and fatty acid composition of, 341
MEL gene, encoding α-galactosidase, nucleotide sequence of, 220
Mesentericin Y105, natural variation in susceptibility in *Listeria* strains to, 1
Mesorhizobium sp., relationship of *Astragalus cicer* microsymbionts to, 142
Methanogen, with tubule isolated from estuarine environment, 15
Methanosarcina mazei strain O1M9704, isolated from estuarine environment and with tubular structure, 15
Methylobacterium mesophilicum, in auto air-conditioning systems, volatile organic compounds produced by, 206
Microorganism release, from insects killed by electrocuting insect traps, 267
Mosquito control, role of genetically engineered *Anabaena strains* in, 352
μ-oxo bishaem binding, by *Porphyromonas gingivalis*, effect of increased temperature on, 328
Musca domestica L., electrocuting insect traps release bacteria and viruses from, 267
Mutans streptococci, effect of *Apis mellifera* propolis on, 192

NADH dehydrogenase, of *Bacillus* YN-1, peroxide reductase activity of, 388
Natural mineral water, isolation and characterization of autochthonous microbiota from, 379
Nickel, resistance of aerobic and anaerobic thermophilic microorganisms to, 201
nifH sequence, phylogenetic and taxonomic relationship of *Nostoc* and *Anabaena* genera determined by, 197
NIH group 42, phenotypic and genotypic characteristics of *Enterobacter cowanii* sp. nov. referred to as, 417
Nikkomycin biosynthesis, of *Streptomyces ansochromogenes*, cloning, sequencing, and function of *sanF* gene involved in, 312
Nisin, combined with other bacteriocins, effect on *Listeria* species survival, 410
Nisin A, natural variation in susceptibility in *Listeria* strains to, 1
Nitrate reductase activity, by *Fusarium oxysporum* 11dn1 under aerobic and anaerobic conditions, 114
Nitrogen availability, effect on internal glutamine and glutamate pools in *K. pneumoniae*, 357
Nitrogen fixation (nif) gene, of *K. pneumoniae*, internal glutamine and glutamate pools and, 357
Nitrous oxide production, by *Fusarium oxysporum* 11dn1 under aerobic and anaerobic conditions, 114
Nostoc genera, phylogenetic and taxonomic values of *nifH* sequences of, 197

Orotidine-5′-phosphate decarboxylase gene (URA4), from *S. exiguus* Yp74L-3, molecular cloning and DNA analysis of, 421
Oxidized insulin B chain, *T. sacchari* Zn-dependent proteinase specificity toward, 70

Pectinophora gossypiella, pesticidal and receptor binding properties of *B. thuringiensis* Cry1Ab and Cry1Ac mutants against, 430

Pediocin AcH, natural variation in susceptibility in *Listeria* strains to, 1
Penicillium viridicatum, in auto air-conditioning systems, volatile organic compounds produced by, 206
Peroxide reductase activity, of NADH dehydrogenase in presence of 20-kDa component of *Bacillus* YN-1, 388
pH stress, effect on salt tolerance of *Rhizobium* sp. sesbania strains, 402
Phenanthrene, as source of carbon for *Bacillus* sp., 11
Phenoxyherbicide, stress shock proteins induced in *Burkholderia* sp. YK-2 by, 33
Phosphate, nitrogen assimilatory enzymes in *Spirulina platensis* modulated by, 368
Phospholipid composition, as chemotaxonomic marker of *Altermonas*-like proteobacteria, 341
5-Phosphoribosyl 1-pyrophosphate (PRPP), *B. subtilis* purine repressor mutations perturb effector function of, 56
Phylogenetic analysis of secondary endosymbionts of psyllids, 300 of *wsp* gene sequences from *Wolbachia* of filarial nematodes, 96
Phylogenetic tree, of yeasts based on orotidine-5′-phosphate decarboxylase coding regions, *S. exiguus* Yp74L-3 related to *S. cerevisiae* F100 shown by, 421
Phylogeny, pigmented, aerobic, spore-forming *Bacillus* isolates from Gulf of Mexico, 84
Physical map, of pSymb megaplasmid of *Sinorhizobium meliloti* strain 1021, 109
Plasmid pS86, from *Enterococcus faecalis*, nucleotide sequence of, 257
Pleurotus florida, laccase substrate accumulates in gills during sporulation of, 167
Polygalacturonate activity, of *Prevotella* type strains on different growth substrates, 45
Polymerase chain reaction (PCR), *cry* gene contents of *B. thuringiensis* isolates analyzed by, 250
Polysaccharide-degrading activity, of *Prevotella* type strains, phenotypic characterization of, 45
Porphyromonas gingivalis, temperature elevation regulates iron protoporphyrin IX and hemoglobin binding by, 328
Potassium transport, in *Fusarium oxysporum* var. *lini*, 363
Prevotella type strains, phenotypic characterization of polysaccharidases produced by, 45
Proteinase, from *T. sacchari*, proteolytic specificity toward oxidized insulin B chain, 70

Proteolytic activity, of *Bacillus polymyxa* lectins, relationship with hemagglutinating activity, 246
Proteus mirabilis, resistant to heavy metals and antibiotics in waste water, 151
Protocatechuate pathway, *Bacillus* sp. degradation of phenanthrene via, 11
Pseudoalteromonas strains, phospholipid and fatty acid composition of, 341
Pseudomonas aeruginosa associated with urinary tract infections, hydrogel/silver-coated catheters reduced adhesion of, 120
effect of insulin on growth kinetics of, 60
resistant to heavy metals and antibiotics in waste water, 151
Pseudomonas aeruginosa PAO1, characterization of alanine racemases from, 290
Pseudomonas fluorescens, resistant to heavy metals and antibiotics in waste water, 151
Pseudomonas jessenii, low-substrate regulated microaerophilic behavior of and CRA production by, 79
Pseudomonas strains, isolated from autochthonous microbiota from granitic aquifer, 379
Psyllids, phylogenetic analysis of 16S-23S rRNA genes of secondary endosymbionts of, 300
pSymb megaplasmid, of *Sinorhizobium meliloti* strain 1021, high-resolution physical map of, 109
Pulsed field gel electrophoresis (PFGE) genetic fingerprinting of *Brevibacterium linens by*, 50
of *Streptococcus pyrogenes* serotype M1 *sic* gene, 106

rfa promoter, expression in *Salmonella typhimurium* during invasion of intestinal epithelial cells, 172
Rhizobium leguminosarum strain 252, effect of agglutinins on activity of hydrolytic enzymes, 73
Rhizobium sp., effect of aluminum on production of siderophore by, 5
Rhizobium sp. sesbania strains, from neutral and alkaline soils, effect of extreme salt, pH, and temperature conditions on, 402
Ribonucleotide reductase, in γ-*Proteobacteria* species, occurrence of all three classes of, 346
Ribose, utilization by *S. ruminantium*, *S. bovis*, and *B. ovatus*, 182
Ribotyping, genetic fingerprinting of *Brevibacterium linens by*, 50
Rice leaf folders, toxicity and receptor binding properties of *B. thuringiensis* δ-endotoxins to midgut brush border membrane vesicles of, 276
Root elongation, effect of replacing ACC deaminase gene in *E. cloacae* UW4 on, 101
rpoN gene, effect on *Enterococcus faecalis* sensitivity to subclass IIa bacteriocins, 441
Rubidium uptake, in *Fusarium oxysporum*, effect of K^+ status on kinetics of, 363
Ruminal glucose fermentation, effect of thymol on, 336

Saccharomyces diastaticus NCYC 625, role in Jerusalem artichoke extract fermentation, 89
Saccharomyces exiguus Yp74L-3, molecular cloning and DNA analysis of orotidine-5′-phosphate decarboxylase gene from, 421
Salmonella typhimurium fdhF expression in *selD* mutant of, 39
rfa expression during invasion of intestinal epithelial cells by, 172
Salt downshock, effect on betaine-homocysteine methyltransferase and glycinebetaine degradation, 227
Salt tolerance, of *Rhizobium* sp. sesbania strains at high pH and temperatures, 402
SanF gene, involved in nikkomycin biosynthesis, cloning, sequencing, and function of, 312
Sargassum asperifolium biosorption of heavy metals by, 232 role in biosorbent mass for Pb^{2+} recovery of, 239
Secondary endosymbionts, of psyllids, cloning and sequencing of, 300
Selenomonas ruminantium, deoxyribonuclease activity in, 182
Selenomonas ruminantium HD4, effect of thymol on growth and lactate production of, 336
Short circuit current, of *Helicoverpa zea*, correlation of *B. thuringiensis* δ-endotoxin protein toxicity with inhibition of, 214
Shuttle vector pSBE2A, constructed from pSBO2 and transforms *S. bovis* and *E. coli*, 27
Siderophore production, by *Rhizobium* sp., effect of aluminum on, 5
Sinorhizobium meliloti strain 1021, physical map of pSymb megaplasmid and comparison of three replicons of, 109
Sodium transport, in *Fusarium oxysporum* var. *lini*, 363
Sphingomonas paucimobilis, enhanced degradation of hexachlorocyclohexane isomers by, 309
Spirulina platensis, calcium and phosphate regulation of nitrogen metabolism in, 368
Sporulation, of *Pleurotus florida*, laccase substrate in gills during, 167
Sporulation-specific biochemical functions, of *Bacillus thuringiensis* var. *israelensis* not related to crystal protein production, 187
Staphylococcus aureus effect of insulin on growth kinetics of, 60
glutamine synthetase expression in *Bacillus subtilis* controlled by *glnR* from, 425
Staphylococcus aureus cells, inhibition of 50S ribosomal subunit formation in, 126
Staphylococcus sp., resistant to heavy metals and antibiotics in waste water, 151
Streptococcal inhibitor of complement (sic) gene, encoding complement-inhibiting protein of *Streptococcus pyogenes*, variation on, 106
Streptococcus bovis, deoxyribonuclease activity in, 182
Streptococcus bovis JB1 characterization of cryptic plasmid pSBO2 isolated from, 27
effect of thymol on growth and lactate production of, 336
Streptococcus mutans, antibacterial carbohydrate monoesters suppressed cell growth of, 210
Streptococcus pyogenes serotype M1, variation in *sic* gene encoding complement-inhibiting protein of, 106
Streptococcus thermophilus, comparison of plasmid-borne low-molecular-weight heat stress proteins of, 177
Streptogramin B, inhibition of 50S ribosomal subunit formation by, 126
Streptomyces ansochromogenes, *sanF* gene involved in nikkomycin biosynthesis of, 312
Stress response, of aquatic and soil bacteria seen as low-substrate regulated microaerophilic behavior, 79
Stress responsive gene (sti35), of *Fusarium oxysporum*, targeted disruption of, 284
Stress shock proteins, induced in *Burkholderia* sp. YK-2 by phenoxyherbicide 2,4-D, 33
Sucrose, *Lactobacillus amylovorus* JCM 1126 mutant and improved utilization of, 392

Temperature stress, effect on salt tolerance of *Rhizobium* sp. sesbania strains, 402
Thermoactinomyces sacchari, specificity toward oxidized insulin B chain of neutral Zn-dependent proteinase from, 70
Thermophilic microorganisms, from hydrothermal vents, susceptibility to heavy metals of, 201
Theta replicon, ORF1 of pS86 from *Enterococcus faecalis* similar to, 257
Thylakoid membrane, of $NaCl^r$ mutant strain of *Anabaena variabilis*, isolation and characterization of, 321
Thymol, effect on growth and lactate production by *S. bovis* and *Selenomonas ruminantium*, 336
Toxicity, of *B. thuringiensis* δ-endotoxin proteins against *H. zea*, 214
2,4,6-Trinitrotoluene, white rot fungal degradation of, 317
Tubinaria decurrens, biosorption of heavy metals by, 232

Ulva lactuca, role in biosorbent mass for recovery of, 239
Urinary tract infections, hydrogel/silver catheters compared with all-silicone catheters in inhibiting adhesion by bacteria associated with, 120

Volatile organic compounds, from *Penicillium viridicatum* and *Methylobacterium mesophilicum* in auto air conditioning systems, 206
Voltage clamp analysis, short circuit current inhibition of *H. zea* measured by, 214

Waste water, bacterial isolates resistant to heavy metals and antibiotics found in, 151
Water-insoluble glucan (WIG) synthesis, by mutans streptococci, effect of propolis on, 192
White rot fungi, comparison of 2,4,6-trinitrotoluene degradation by seven strains of, 317
Wolbachia surface protein gene (wsp), from *Wolbachia* of filarial nematodes, sequences of, 96

Xylanase activity, of *Prevotella* type strains on different growth substrates, 45

Zinc, resistance of aerobic and anaerobic thermophilic microorganisms to, 201
Zygosaccharomyces mrakii, nucleotide sequence of α-galactosidase *MEL* gene from, 220
Zymomonas mobilis, heptadecanoic and C19 cyclopropane fatty acids in lipid fraction of, 305
